CHANGE OF ADDRESS

MAYFAIR NURSERIES HAS MOVED TO A NEW LOCATION

To better serve our clients and to grow more and better rock plants, we have moved from our old and sequestered little nursery in Bergenfield to a larger, better and easier to find location on **RUCKMAN ROAD** in **HILLSDALE, NEW JERSEY**. In the rush of moving we have lost some plants and failed to propagate some others soon enough, which will be dropped from our lists for the next year. If we cannot supply any of the plants ordered, we shall notify you at once, however, we still have almost all the species listed in our catalogue, plus some new ones described herein. We still continue to grow all our plants in pots to insure better plant, safer transplanting and reliable shipping.

Fall is an excellent time for planting most rock plants, and our pot grown plants can be planted safely through October and November in most parts of the Country. Please use our old catalogue for descriptions and prices, and this folder for new listings and price changes; then send your order to:

MAYFAIR NURSERIES

Box 87

HILLSDALE, NEW JERSEY

WESTWOOD 5-0910

Plants that are not ready or do not transplant well at this time will be held for Spring delivery. For anyone desiring to visit the nursery, we have drawn a road sketch on the back of this folder, to make it easier to find. Beginning September 15th we offer a 10% discount for cash and carry orders. (Except on trade discounts.)

SUPPLEMENTARY PLANT LIST

This list is small and the descriptions are short for space will not permit a lengthy discourse, but we can assure you all the plants listed below are well worthy of a place in your rock garden.

ALYSSUM MURALE (argenteum) An easily grown plant that makes nice bushy clumps of neat silvery gray leaves and a continuous shower of yellow flowers on 12 inch stems from Spring to Fall.
50c each, 3 for \$1.25, 12 for \$5.00

DIANTHUS SAMMY. One of the prettiest little pinks for the rock garden. Neat 2 inch high mats of glaucous foliage, covered with tiny double pink carnations in May and June.
50c each, 3 for \$1.25, 12 for \$5.00

IBERIS GIBALTARICA. An evergreen candytuft very similar to *I. sempervirens* in growth, but it has large clusters of showy pinkish flowers in Spring and sometimes in Fall.
50c each, 3 for \$1.25, 12 for \$5.00

IRIS TECTORUM. The Japanese roof iris. It makes clumps of broad leaves about 10 inches high and produces large flowers in late Spring that resemble huge, wide open blue orchids.
50c each, 3 for \$1.25, 12 for \$5.00

LEONTOPODIUM ALPINUM. The Swiss Eidleweiss needs no description. Gray leaves and gray flowers.
50c each, 3 for \$1.25, 12 for \$5.00

THYMUS SERPYLLUM CONGLOMERATA. Our own introduction. A sport of *Thymus serpyllum* coccineus that develops club growth, hence it stays dwarf, compact and slow growing. Showy red flowers. Really one of the best Thymes for the rock garden.
50c each, 3 for \$1.25, 12 for \$5.00

VERONICA CHAMAEDRYS ALBA. Lovely clumps of soft green leaves and an abundance of showy pure white flowers in loose sprays in late Spring. Grows well in sun or shade.
35c each, 3 for 90c, 12 for \$3.50

PHLOX DIVARICATA CHATTAHOOCHEE. Collected by Mrs. J. Norman Henry in Florida. It is hardy here but may need protection farther North. The strikingly beautiful flowers are hard to describe, being of a deep mauve with a dark purple eye.
50c each, 3 for \$1.25, 12 for \$5.00

PRICE CHANGES

The prices on the following plants have been changed from those listed in our catalogue to the new prices stated below. This does not mean that the plants have been lowered in worth, but that we have a large stock and we want their attractive flowers to be enjoyed by more people.
